ABOUT ME

Analytics Engineer with experience in fintech, education, and business research, specializing in SQL, Python, BI dashboards, ETL pipelines, KPI forecasting, and time-series anomaly detection. Skilled at translating business questions into analytics-ready datasets, automated reporting workflows, and actionable insights for cross-functional stakeholders.

TECHNICAL SKILLS

- Programming & Querying: SQL, Python, PySpark
 - Data Engineering: Airflow, ETL pipelines, data modeling, dataset design, data quality checks
 - BI & Visualization: Tableau, Power BI, dashboard development, KPI reporting, data storytelling
 - Analytics & Modeling: EDA, statistical analysis, forecasting, time-series anomaly detection, machine learning, NLP, Matrix Profile
 - AI-assisted Development: Codex, Claude for SQL/Python coding, debugging, refactoring, documentation, and workflow automation
 - Domains: Fintech, finance, education, business research
-

PROFESSIONAL EXPERIENCE

VNG Corporation - Zalopay | Jun 2024 - Present

Analytics Engineer

- Owned end-to-end development of KPI, product, and business performance dashboards for cross-functional teams, enabling faster monitoring of core metrics and reducing dependency on ad-hoc manual reporting.
- Designed ETL pipelines using SQL, PySpark, and Airflow to transform raw operational data into analytics-ready datasets for BI, reporting, and exploratory analysis.
- Analyzed multi-source datasets to identify trends, patterns, anomalies, and drivers of business performance.
- Developed a Matrix Profile-based anomaly detection and alerting solution to detect abnormal patterns across CS tickets, variable costs, and patterns across product flows.
- Partnered with Product, Business, Finance, and Operations stakeholders to clarify metric definitions, translate business questions into analysis requirements, and deliver actionable insights.
- Developed forecasting models to support company-wide KPI planning and performance monitoring.
- Supported ad-hoc data requests and root-cause analyses by querying, validating, and interpreting data across multiple business datasets.

PROFESSIONAL EXPERIENCE

Vtecs Holdings | Jan 2023 - Jun 2024

Data Analyst

- Optimized SQL queries, stored procedures, views, and triggers for data extraction, transformation, and dataset management, reducing query execution time by 70%.
- Managed end-to-end data preprocessing using SQL, Python, and Excel, ensuring data quality and reliability for downstream analysis.
- Conducted EDA to identify patterns, trends, anomalies, and opportunities for business or operational improvement.
- Automated web-based workflows using Python to reduce manual processing effort.
- Developed a Python-based timetable scheduling system using genetic algorithms to automate class scheduling and improve allocation efficiency.

Vietnam Industry Research and Consultancy (VIRAC) | Apr 2022 - Dec 2022

Research Analyst

- Conducted industry and business research by integrating internal and external data sources to support client deliverables.
- Extracted, manipulated, and validated data from Oracle databases using SQL for research and reporting purposes.
- Developed automated reporting templates, reducing report creation time by approximately 50%.

PricewaterhouseCoopers Vietnam (PwC Vietnam) | Dec 2021 - Mar 2022

Audit Intern

- Assisted audit engagements by examining financial statement figures, supporting audit documentation, and presenting findings clearly to senior team members.
- Participated in stock counts and internal control walkthroughs to support the assessment of clients' operational and financial reporting processes.
- Supported the investigation of unusual transactions and potential fraud indicators within clients' key business activities.
- Assisted senior associates and managers in preparing audit reports, handling supporting documents, and completing administrative tasks throughout the audit process.

TEACHING & MENTORING EXPERIENCE

Freelance & CoderSchool | Jul 2023 - Dec 2025; Apr 2026 - Present

Data Mentor / Course Instructor

- Delivered freelance training in SQL, Power BI, Python, and fundamental Machine Learning, focusing on hands-on data analysis and business problem-solving.
- Since Apr 2026, mentored learners at CoderSchool in Data Science and Data Analytics Express tracks.
- Conduct 1:1 mentoring sessions, review assignments and projects, debug learners' code/analytical logic, and guide students in building portfolio-ready data projects.
- Provide career-oriented guidance on data role expectations, project presentation, CV/portfolio improvement, and interview preparation when needed.

HIGHLIGHTED DATA PRODUCTS / PROJECTS

- Company-wide KPI Forecasting Model - PySpark, KNN. Built a model to forecast key business KPIs and support company-wide planning and performance monitoring.
- KPI / Business / Product Performance Dashboard - PySpark, SQL, Tableau. Designed dashboards for monitoring core product and business metrics.
- Time-Series Anomaly Detection & Alerting System - PySpark, Matrix Profile. Built an anomaly detection and alerting solution to monitor abnormal patterns across CS ticket volume, variable costs, and FE product tracking events, helping teams identify unusual spikes, drops, or behavior changes in key product flows.
- Automated Timetable Scheduling System - Python, Genetic Algorithm. Developed an optimization-based scheduling system based on operational constraints.

EDUCATION

University of Economics Ho Chi Minh City

Master of Business - Management Information Systems | 2024 - 2026

University of Economics Ho Chi Minh City

Bachelor of Accounting - Auditing | 2018 - 2022

MindX Technology School

Data Analysis Courses - [Certificate](#) | 2022 - 2023

CERTIFICATES

- TOEIC 770 - IIG Vietnam
 - SQL (Advanced) - [HackerRank](#)
 - Google Data Analytics Specialization - [Coursera](#)
 - Scientific Computing with Python - [freeCodeCamp](#)
-
